

# SunWave **W2**

LIVE TOMORROW, **TODAY**

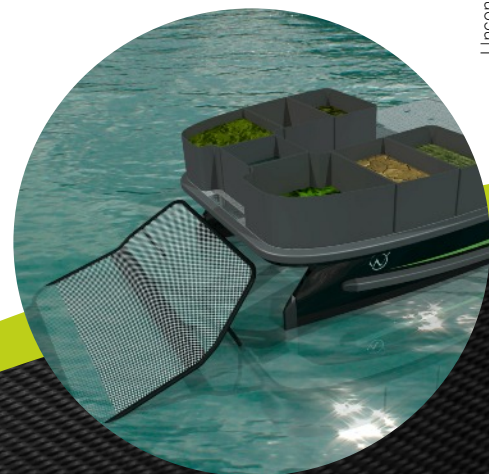

## The solution for “clean ports”

The SunWave **W2** is an electric service boat which can be equipped with solar recharging. It is a **non-polluting** ship and it allows cities to get the eco label « **Clean Ports** ». With its two engines with a strong torque and with its electrical steering, the SunWave W2 offers a high **manoeuvrability**.

Thanks to its wide platform and to its **modularity**, the SunWave W2 will answer to all the needs **in port services**.

- Length: 7.00m (8.00m with waste collection device)
- Width: 2.62m
- Draught: 0.72m
- Air draught: 1.60m
- Payload: 1,700 kg
- Electric motors: 2 x 15 kW
- Solar option possible
- Economical cruising speed: 6 knots
- Max.speed: 20 knots
- Self-sufficiency: from 6 to 12 hours at economical speed depending on the pack of batteries
- Energy capacity of lithium batteries: from 2 to 4 packs of 12 kWh
